Please do not pass this! Since XM radio launched traffic and weather. I can get current up to date information when I need it, not when the local stations (which in Chicago all suck) decide to give it. Not only would this be an infringement of our freedom of choice to listen to what we want. We would be being dictated. If, that occurs we all might as well live in a communistic country. There are no descent radio satiations in the Chicago area and that is why I choose to pay to receive satellite radio. I do not see why you would even consider dictating since we pay for the service. I choose to subscribe where I can listen to what I want. Plus you allow free stations to air the format of their choice. This allows the local stations to air political, religious material at their views, which prayer and the pledge if allegiance has been removed from schools, which is more of an issue of simple traffic or weather report. If their was more service like XM radio, maybe the free stations would be forced to improve their service, hey maybe that?s why NAB is lobbying, they know that there networked stations sucks. WELL IMPROVE AND YOU WOULD?T BE LOOSING LISTNERS!!!!!!
